

Manufacturing Technology

**The best components**  
for your (special) machines

# Traditionally simply unbeatable

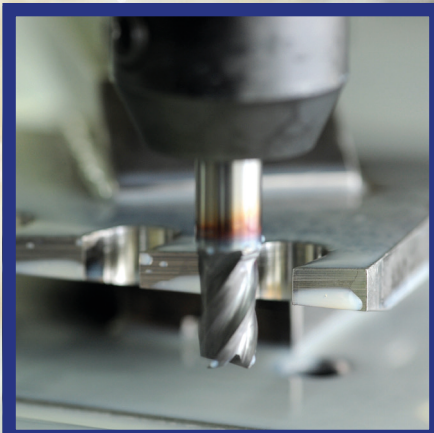

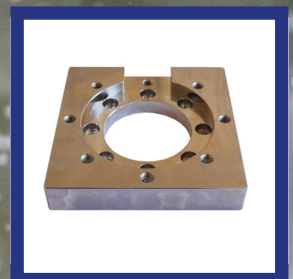

Decades of experience as well as the continuous modernisation of our machinery enable us to provide the best possible, quickest and easiest production of special devices and machine parts. The utmost precision is a matter of course for us.

## Our service for you:

- Production of special devices as well as machine parts in single piece or small-scale series.
- Supply of entirely assembled components upon request.
- Production according to your drawings or samples.
- Application of the whole range of heat treatment processes as well as different coating technologies offered by network partners.
- Machine parts for special machines and spare parts for older machines.

## Our production processes:

- CNC-milling (up to 5 axes)
- Wire eroding
- Surface grinding (peripheral- and discus-grinding)
- Circular and rotary table grinding (inner and outer)
